

una pregunta de chairgun

Escrito por carpin - 31/10/2010 11:50

¿que es "scope height"?

Creo que es la altura entre el anima del cañon y el centro visor.
Corregirme si me equivoco.

Es la distancia entre el centro del visor y el centro del cañón

- 1.- mides la campana del visor y divides por 2
- 2.- mides el cañón por fuera y divides por 2
- 3.- mides la distancia entre la parte superior de cañón y el inferior de campana de visor
- 4.- sumas las tres cantidades, y eso es "scope Height" (altura de visor)

saludos
